

# The Signifier of Father

Cemal Cicek

28 February 2020

In astrology there are many claims that are not true. It applies to both Western and Indian astrology.

In order to control these claims, we need the right tools, by right tools I mean the right astrological techniques and astrological software.

Without harmonics it is impossible to control many claims.

Without harmonics, you will not realize that astrology is an exact science.

You can continue to look at 360° horoscopes for all eternity, you will miss many things and you will inevitably speculate.

The significator of father is Jupiter. Whether the person is born day or night, it makes no difference.

The event of the death of the father should be studied, especially planetary pictures ;

$$4/\Psi = \odot$$

If you look at this solar with Harmonic 256, you will see that solar  $\sigma/\hbar$  also forms exactly harmonic with natal 4.

Therefore I say that you should not only work with one harmonic but with several harmonics (16,64,256,1024 and 4096).
